

How to Use the Bracket Order Feature on NOVA

NOVA Web:

For a bracket order, a take-profit (limit order) and/or a stop-loss (stop order) can be placed. You can set your bracket order using **Ticks** or **Price**.

- Order Ticket Example 1 (Using Ticks):

Target Profit/Stop Loss can be set based on number of ticks from limit price. Target Profit/Stop Loss price and Estimated Profit will be indicated. Do note that estimated losses are indicative as slippage could occur.

CME MICRO E-MINI NASDAQ SEP26		
29095.50 Low	29310.00 High	502881.0 Volume
29217.00 Last	29276.75 YDSP	-59.75 Change
